

LABORATORY FEELING OUT OF CONTROL?

ARC COMPLETEA KNOWS HOW TO FIX IT.

Arc Completa has over 50 years experience in Laboratory and Operations Management. We specialize in high risk laboratory environments (such as semi-conduction cleanrooms), but can also provide assistance in more conventional manufacturing environments and academic settings.

Our experts objectively assess your facility, process, and operations as a baseline and work with you and your team to determine level of need and the extent of the program required. Each step in the process is interactive and designed to provide training and transition to a standard operating practice.

LET OUR EXPERTISE HELP YOU AND YOUR TEAM BECOME EXPERTS

SAFETY & OPERATIONS

Arc Completa offers safety and operational audits for both private and public institutions. These audits are designed to give an organization a third party view of operations as they pertain to operations.

We specialize in high risk laboratory environments (such as semi-conductor cleanrooms), but also provide assistance in more conventional manufacturing environments.

Safety is always first and safe processes run best. Integrating safety training and practices into daily operations lets employees focus on output and efficiency..... and lets you focus on growing your business.

PREVENTIVE MAINTENANCE

Our Preventive Maintenance (PM) evaluation and system creation helps you maximize your up-time.

Starting with a maintenance contract review and consolidation, we work with your team to map-out an efficient and effective plan which helps your output without hurting your throughput.

We evaluate your current system, and utilize provided data and interviews to look for areas of improvement. We can help you improve your MTBF and the utilization of your resources to deliver a better product to your customers.

OTHER AREAS OF EXPERTISE

Complementing our laboratory expertise, Arc Completa has a broad range of education, training, and traditional and non-traditional consulting offerings for industry, research, academia and other business areas.

In addition to industry experience, our staff has a combined 50+ years of college teaching experience in Engineering and Business. We can custom tailor a training program for your staff in a wide range or areas:

- Operations Efficiency
- Design for Manufacturing
- Data Analysis
- Grant Writing and Funding
- Organizational Behavior
- Training Program Development
- And Many Other Areas
